

## **SP Diagnostics**

Design and Manufacture of Products and Services for the Automotive Industry and AfterMarket

---

### **Press Release**

For Immediate Release: Thursday 13th January 2011

#### **NEW PRODUCT LAUNCHED: SERVICE SCAN HANDSET**

---

SP Diagnostics are proud to announce the latest addition to our automotive diagnostic range, the Service Scan.

More and more vehicles being seen in garages today can't be serviced and maintained with mechanical tools alone. Jobs such as changing brake pads, resetting service intervals, fuel additive and many more need an electronic service tool to complete the work.

The Service Scan handset is the user friendly automotive service tool, complete with EOBD code reading and scanning. Building on the success of the SPi and ACR handsets, the Service Scan provides the same service and EOBD functions of the SPi at a lower cost.

#### **Features:**

- EOBD Code Reading & Live Data - with Manufacturer Specific Codes!
- On-Screen Guidance & Help - Save Screen Data
- Just 1 Harness for all 16 Pin Vehicles
- Upgradeable & Updateable
- Never Times Out
- Support for Vehicles from 1987 to 2011+
- Wireless Ready for Add-on Modules
- WASP Add-on for Wireless Measurements
- Handheld, User Friendly & Easy to Use
- Illuminated Ergonomic Translucent Case
- Non 16 Pin Legacy Harnesses Adaptor Available

### Functions:

Reset Service Lights + Messages - Full EOBD  
Fuel Additive - Service Intervals - Oil Degradation - Gearbox  
Injector Programming - TPMS - Suspension - Steering Calibration  
Electronic Handbrake - Injector Calibration - Aircon - Parking Sensors and More...
