Landrover / Range Rover EPB & Service Reset Tool

- Handheld, user friendly, simple and easy to use
- Compatible with latest CAN vehicles
- Performs park brake function needed to service & repair brake systems
- Resets service lights on Landrover / Range Rover range listed
- Updateable (return back to SP Diagnostics)
- Extra fast service indicator reset process

Overview

The new Landrover service tool has been designed not only to extinguish service indicators, but to provide electronic park brake functions such as releasing the park brake cable allowing the

brakes to be changed.

Fast and efficient, the service light reset function takes seconds, where other manufacturers equipment can take 10s of minutes!

Functions

- Service Reset - Resets the service indicator on the vehicle
- EPB Release - Releases the cable to allow the brakes to be changed on the vehicle
- Cable Reset - Resets the cable after the emergency cable release has been activated
- EPB Unjam - Allows the EPB to be un-jammed when the vehicle has entered a state when brakes screech when applying the park brake, the rear brakes squeak or rub when the vehicle is moving or there is evidence of shoe-drag.
 - Clear Codes - This allows you to clear any codes that are or have been present as a result of the emergency cable being activated or the park brake becoming jammed.
